

- 1) Close the Race Program if currently running.
- 2) Download Race Program Update ...RaceProgramUpdate10440.exe
- 3) Run the program update by double clicking the file. Winzip Self-extracting utility will open.

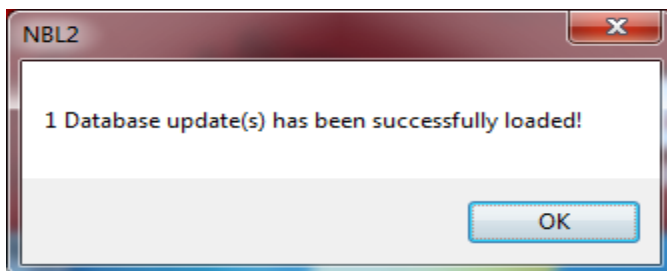

- 4) Click the UNZIP button...The process will unzip 12 files.

**NOTE: VISTA users may experience security issues because UAC (user account control) not allowing the WinZip self extracting tool. In this case download the ZIP file option and extract all files from the zip file to c:\program files\National Bicycle League.**

- 5) Run the race Program...the race program will automatically look for any database patches in the root directory c:\program files\national bicycle league. If a database update is found it will automatically load the update script. Aft the patch is loaded the race program will notify the user how many database updates were applied.

The race program will now be running at version 1.0.44.0.
